Description

A modern layout for an online newspaper from the early 2000s using React/Bootstrap/Sass. This project seeks to modernize and improve the original design, as part of an effort to preserve the articles, comics, and stories.

Features

- Access to Articles, Comics, and Stories across different Issues
- Mobile-Friendly design
- Multiple dynamic pages

Planning - User Stories

As a mobile user, I want to be able to comfortably read the Times on my phone so that I can read it anywhere.

As a modern user, I want a layout that fits more modern trends so that I can better enjoy the current content.

Technology Stack

- JavaScript
- React
- Sass
- Bootstrap
- React Router
- React Responsive
- JSON

Demo

What I Learned

- Learned Sass and Bootstrap and React Router v6
- Connecting html text to React
- Working with large amounts of complicated real-world data.

What's Next

- Search Feature - Users should be able to find a particular author or story.
- Database - Need to review mySQL and properly store the data.
- API - Convert from using only JSON files to developing a proper API
- Deployment - Publish this app for the world to see!
